INVENTORY ANALYSIS

Current stock valuation, record-level review, and reconciliation leads

Live database snapshot: 10 November 2026, India time. This report is a read-only analysis of the current LC Billing inventory and linked bill records.

RETAIL VALUE	AVAILABLE PIECES	AVAILABLE METRES	PRODUCTS IN STOCK
Rs. 16,331,204	7,336	9,282.2	2,059

What this report includes

Current quantities and listed-price valuation for 2,059 in-stock products across 24 categories; complete category summaries; prioritized inventory flags; all 193 inventory rows where bills exist but the recorded quantity still equals receipt; and a complete product appendix.

Important interpretation

Retail value means available quantity multiplied by the product's current listed selling price. It is not purchase cost, accounting value, or a physical count. A flagged row is a lead for review, not proof of fraud or a confirmed fake item.

Priority result

IN0017390 (JW-0565, RF - 39) has 100 received, 100 billed across six open bills, and still shows 100 available. It was marked scanned in stock verification on 9 Nov (India time), but this app records the row's existing quantity when scanned; the scan does not independently count 100 individual pieces. This is the first item to physically count.

Snapshot checks

11,244 inventory rows; 7,420 available rows; 2,581 catalogue products; 4,081 bill lines; 2,130 rows marked scanned/verified; no duplicate inventory numbers or broken product/category links found.

1. Executive findings

Finding	Count / value	Interpretation
Bills exist; current quantity equals original receipt	193 rows (63 marked scanned; 130 not marked scanned)	Reconcile these. A sale line exists, but the current quantity has not changed from received quantity in the record. Imported history, row design, or actual stock error may explain it.
Large receipt for piece item	1 row	IN0017390: 100 received and 100 billed, but still 100 available. Highest priority; physically count.
Very long single fabric receipt	4 rows	Receipts of 500 m or more. Confirm against roll labels or supplier records.
Receipt equals current product price	6 rows	Possible clerical coincidence. Four are fabric rows; quantity-price equality alone is not evidence of error.
Possible unit setup mismatch	3 products	Review unit for saree, blouse ponchor and work flower entries; metre units may be intentional for material.
Structural data checks	No duplicates / broken links	No duplicate inventory numbers, missing product/category references, negative quantities, or invalid statuses.

Method and limitations

Available stock is grouped by product and category from rows whose status is “available.” Retail value is quantity × current product price. Bill totals exclude invoices explicitly marked cancelled; none were marked cancelled in the snapshot. The 193 bill/quantity flags compare the current quantity field with received_quantity and sum linked non-cancelled invoice-line quantities. This is a reconciliation signal, not an assumption that bill history should simply be subtracted from today's stock: returns, physical counts, and legacy imports can change the interpretation.

Stock verification limitation: the app's verify action copies the existing quantity into the verified quantity when a barcode is scanned. It logs a scan of the inventory row but does not ask the user to enter or count the actual number of pieces/metres. Therefore “verified” here means scanned/marked in the app, not independently quantity-counted.

The analysis cannot determine whether stock physically exists, whether a manager made an entry error, or whether an imported row is fake without a physical count, purchase/roll documentation, and the corresponding old-system record. No live database data was changed.

2. Inventory by category

All available stock. Pieces and metres are split according to the product unit. Retail value uses current catalogue prices.

Category	Products	Stock rows	Pieces	Metres	Retail value
SAREES	492	1,319	1,318	1	Rs. 4,555,995
FABRICS	104	294	130	8,892.4	Rs. 3,322,125
SALWAR	265	782	782	0	Rs. 2,138,110
SUIT	192	793	793	0	Rs. 1,802,711
JEWELLERY	489	1,642	1,726	339.8	Rs. 1,302,224
KURTHI	84	598	598	0	Rs. 772,753
NIGHTIES	70	434	434	0	Rs. 443,150
LEHANGA	42	80	80	0	Rs. 423,600
SHALL	28	294	294	0	Rs. 255,340
CO-ORD	35	146	146	0	Rs. 202,118
BLOUSE	40	126	126	0	Rs. 201,708
WESTERN TOPS	40	113	112	28	Rs. 200,640
INDO WESTERN	25	45	45	0	Rs. 159,500
FROCKS	21	102	102	0	Rs. 143,545
LEGGINGS	10	183	183	0	Rs. 101,601
PANTS	14	50	50	0	Rs. 78,950
INNER WRAR	25	106	106	0	Rs. 59,480
INNERS	35	122	122	0	Rs. 57,600
BRAS	15	90	90	0	Rs. 37,972
T SHIRT	11	29	29	0	Rs. 32,050
SILPS	9	30	30	0	Rs. 15,210

Category	Products	Stock rows	Pieces	Metres	Retail value
INNERWEAR	3	22	22	0	Rs. 11,350
LACES	3	3	1	21	Rs. 7,850
HAND KACHIF	7	17	17	0	Rs. 5,622
TOTAL	**2,059**	**7,420**	**7,336**	**9,282.2**	**Rs. 16,331,204**

Catalogue has 25 product groups; 24 groups currently have available stock. The single group without available products is omitted from this stock summary.

3. Priority review: IN0017390

JW-0565 · RF - 39 · JEWELLERY · unit NO · listed price ■50

Field	Database value
Received quantity	100 pieces
Current stock quantity	100 pieces available
Linked bill lines	100 pieces across six open bills
App scan status	Marked verified/scanned on 10 Nov local time; scan action records the database quantity, not a physical count
Potential overstatement if no stock remains	Up to 100 pieces / ■5,000 at listed price; physical count required

Linked bills

Bill no.	Date	Status	Qty	Rate	Amount
26270236	2026-05-08	open	91	Rs. 50	Rs. 4,323
26270029	2026-04-04	open	2	Rs. 50	Rs. 100
26270127	2026-04-19	open	1	Rs. 50	Rs. 50
26270002	2026-04-01	open	3	Rs. 50	Rs. 150
26270003	2026-04-01	open	2	Rs. 50	Rs. 95
26270052	2026-04-07	open	1	Rs. 50	Rs. 50
TOTAL			100		

Decision checklist: count the pieces physically; compare to each bill and any returns; inspect the original receipt/purchase record; then adjust only the confirmed quantity. If none remain, the database currently overstates retail stock value by ■5,000.

4. Other quantity and price leads

Very long fabric receipts (verify roll length; could be legitimate):

Inventory no.	Product	Name	Unit	Price	Received / on hand	Status
IN0003466	FB-0036	LCFB - 8	MT	Rs. 750	750	available
IN0003499	SR-0153	LCFB - 16025	MT	Rs. 160	663	available
IN0020641	FB-0001	SMG / 165 / 2	MT	Rs. 250	573	available
IN0018620	FB-0001	FLC - 1	MT	Rs. 500	500	available

Receipt quantity exactly equals current listed price (weak signal only):

Inventory no.	Product	Name	Category	Unit	Price	Received	Billed	On hand
IN0003466	FB-0036	LCFB - 8	FABRICS	MT	Rs. 750	750	0	750
IN0019422	JW-0596	SUD - 20266	JEWELLERY	MT	Rs. 50	50	7	50
IN0003505	FB-0001	LCFB - 250285	FABRICS	MT	Rs. 250	250	0	250
IN0003479	FB-0042	LCFB - 445180	FABRICS	MT	Rs. 180	180	2.5	180
IN0018620	FB-0001	FLC - 1	FABRICS	MT	Rs. 500	500	5	500
IN0017567	JW-0578	RF - 53	JEWELLERY	MT	Rs. 30	30	0	30

Most of these are metre-based fabric entries, where a quantity can coincidentally match the rupee price. Confirm units/rolls from source documents before any correction.

Possible unit setup review

Code	Product	Category	Unit	Available amount	Retail value	Review note
SS-0019	SAREE MGS BA 7	SAREES	MT	1 m	Rs. 6,100	Check product setup; may be intentional material sold by length.
LC-0005	BLOUSE PONCHOR	LACES	MT	3 m	Rs. 4,500	Check product setup; may be intentional material sold by length.
WT-0061	WORK FLOWER	WESTERN TOPS	MT	28 m	Rs. 4,200	Check product setup; may be intentional material sold by length.

Other checks: one zero-price catalogue product (SR-0161, LCSA - 2200) has no available stock, so it contributes ■0 to current inventory value. No duplicate product names were found within the same category in this snapshot.

5. Full reconciliation list: billed, unchanged stock

These 193 rows have one or more non-cancelled bill lines while their current quantity equals their original received quantity. “Scanned” means barcode scan logged; it does not validate the quantity stored on the row. Review with bills, returns, receipts, and physical counts. Bill references below show bill number, date, and quantity.

Inventory no.	Code / product	Category	Unit	Received	On hand	Billed	Scan	Linked bills (number / date / qty)

6. Complete product-by-product inventory

All 2,059 product entries with available stock, grouped by category. “Pieces” or “metres” is populated according to the item unit. Retail value is quantity × current listed price. This is the full stock schedule behind the category totals.

BLOUSE

7. Recommended review order

1. Count IN0017390 “RF - 39” physically and compare all six bills and returns. It is the clearest quantity conflict.

2. Review the remaining 192 bill/stock flags, prioritizing rows with larger billed quantities and rows not marked scanned. Do not mechanically subtract bills from stock; establish how the imported current quantity was set and check return history.

3. Confirm the four long fabric rolls from labels or purchase records: 500 m, 573 m, 663 m, and 750 m.

4. Check product unit setup for SS-0019, LC-0005, WT-0061 and the zero-price product SR-0161.

5. Record the verified physical quantity and supporting document before changing inventory. This analysis did not make any database edits.
